**ATTENTION: MS. WENDY ALBERTS.**

Dear Madam,

We thank you for the opportunity afforded us in meeting with you to discuss how ADT could be of benefit to your members with regards to securing their premises.

As one of the leading security service providers, ADT Security employs a dedicated team of specialists in various fields to ensure that our clients receive a service of the highest standard.

ADT understands the need for providing a more sophisticated product and service to ensure that the security risk to the client is minimized. Implementing and maintaining procedures and standards of the highest caliber result in a quality service for all our clients.

We specialize in security system design – each client has specific requirements that need to be met to ensure that the objective of the system is achieved.

We offer the following:

- Custom designed alarm systems.
- Panic emergency systems.
- Security surveys to ascertain if existing security equipment is adequate and meets with current insurance requirements.
- Proposals on further security measures to enhance the security of the premises – CCTV, Access Control, Electronic Article Surveillance, Electric fencing etc.
- Comprehensive monitoring and armed response service.
- Off site monitoring of CCTV systems.
- Guarding.

We live in an ever-changing environment – criminals are becoming more astute to security systems and insurance companies are instituting specific requirements for these systems before they are prepared to consider providing insurance cover. ADT can be relied on to design systems that meet the necessary standards as well as provide ongoing advice regarding security issues.

Without a doubt security is of prime concern in these times and unfortunately restaurants fall into the high risk category so adequate deterrent measures are vital in minimizing the risk involved.

We have pleasure in submitting the following options for your members which should cover all circumstances:

**To supply and install:**

**1. RADIO LINK TO EXISTING INTRUDER SYSTEM.**

No	Description	Total Price (ex VAT)
1	ADT Radio Transmitter	R1, 100.00
