SOFTWARE

PILOT'S TIP OF THE MONTH

Save thousands by integrating Pilot PoS into Pastel Accounting!

Pilot's Pastel Interface Manager (PPIM) allows for automated transfer of financial, inventory and sales information from Pilot POS to Pastel Xpress, Pastel Partner and Pastel Evolution.

Whether you're a single store, a head office, or do your own books - PPIM will work for you.

Per financial period, PPIM provides:

- Sales - consolidated daily, with VAT split;
- Purchases - split between stock and expenses, with corresponding line item, creditor control or bank control detail;
- Usage (direct costs) - split per category;

By using PPIM, you no longer need to manually enter purchases, expenses, or sales into Pastel.

Once PPIM has processed data, all that remains is balancing your bank and reconciling your creditors - it's that easy!

PPIM even intelligently ensures no duplicate entries are processed!
